

Cup Banks

Cup banks are a simple and effective way of storing used vending cups prior to recycling. Their ability to stack standard 7oz cups in tubes means that they can hold large amounts of cups, reducing the frequency of emptying containers, as well as saving space and making the emptying and transportation of waste much easier.

Beca bin

The Beca bin holds just under 500 cups. There is also a drain in the centre for collecting waste liquid.

- 360 mm depth
- 360mm width
- 650mm height

Multigob Cup Bank

Multigob

The Multigob holds 1600 cups or 800 cups with a separate waste stream.

- 390mm diameter
- 700mm height

Envoy Cup Bank

Holds up to 700 cups and has a separate waste liquid reservoir.

- 540mm width
- 375mm depth
- 870mm height

Envoy Cup Bank

Removable reservoir for easy collection and emptying of up to 9 litres of liquid.

Beca bin 100

Holding 100 cups, the Beca bin 100 has a pop-up indicator to show when liquid flask is full.

- 323mm diameter
- 693mm height
