

Ware 4 Bins & Recycling

Bins, Trolleys, Recycling and Waste Containers

Environmental Policy

Our staff have a background in the environment and experience in the industry. Given the nature of our business we are naturally passionate about waste management and its effects on the wider environmental issues.

- **Our goal** – Ware 4 strive to encourage waste minimisation and recycling within the business and also in the community.
- **Legislation** – we ensure compliance with relevant environmental regulations as a minimum level of performance and regularly check for updates in legislation.
- **Education** – We offer advice and guidance for customers to ensure they have a waste management scheme that will work specifically for them and enhance their environmental performance.
- **Purchasing** – We continually seek to expand our knowledge of the market and source both recycled and recyclable products, which cause least harm to the environment. We expect similar environmental standards from suppliers.
- **Waste** – All office waste is recycled where possible and much of the business is conducted electronically to reduce waste.
- **Water & Energy** – We try to minimise water and energy use and encourage environmentally friendly modes of transport.
- **Assessment** – Continual monitoring of our environmental performance and opportunities for improvement.
