

Ware 4 Bins & Recycling

Recycling Banks 1

Designed in consultation with our customers the 140 and 240 litre ECO-RP bin offers a great solution to the challenge of waste recycling.

The ECO-RP bin can be connected together to form a bank or used as an independent stand-alone unit.

The colour codes for each type of recycling complete with moulded in graphics give a clear indication of which type of waste should be placed in the bin, giving a standardised range for collection of all types of waste.
