

# Ware 4 Bins & Recycling

Bins, Trolleys, Recycling and Waste Containers

## Slim Jim Cup 'n' Stack

The Slim Jim Cup 'n' Stack is designed specifically for the collection of 0.2L vending machine cups, leftover liquids and plastic spoons and stirrers. Durable and cost effective, the lid and stacking tubes will fit all existing 87L Slim Jims.

- 4 holes for the collection of up to 750 x 0.2L vending cups
- Hole for the collection of waste liquid in a 5L reservoir
- Hole for the collection of spoons and stirrers

### Features

- Tubes divide in two to make shipping and cleaning easier.
- The reservoir can be emptied separately from the cups and the spout is designed in a way that, when full, the liquid will overflow into the polyliner. No liquid will spill on the lid and floor. There is a 0.2L reserve before the reservoir overflows.
- The funnel avoids splashing and prevents cups from being disposed of in the reservoir.
- To empty the cups the cleaner simply lifts the tubes and the cups will remain stacked inside the polyliner.
- The reservoir also has a bail handle to make it easy to empty.
