

# Ware 4 Bins & Recycling

Bins, Trolleys, Recycling and Waste Containers

## Uni-cycle

The Uni-cycle range of internal recycling containers are exclusive to educational establishments. Manufactured from durable, high-impact polyethylene, Uni-cycle bins come with a selection of colour coded lids, apertures and locking options for easy separation of multiple waste streams.

### Uni-cycle Tall - 100 litre capacity

The Uni-cycle Tall is a high volume waste container, ideal for recycling and waste collection points in a large busy office or college environment. Unlike other large volume containers, the flat back and slimline design of the Uni-cycle Tall will not impede walkways, making them well suited to canteens, corridors or alongside vending machines.

Available in two styles - inner wheelie bin or bag holder.

### Uni-cycle Mini - 50 litre capacity

The Uni-cycle Mini provides a space saving alternative in areas with lower volumes of waste. Easy to service, these brightly coloured bins are ideal for offices and classrooms.

Both Uni-cycle units can be labelled with your choice of text to reduce cross contamination of recyclable waste streams.

### Benefits:

- The 100L Uni-cycle Tall reduces frequency of emptying.
- Uni-cycle Mini is well suited to areas with limited space.
- Both units are highly durable and easily serviced.
- A wide range of apertures and coloured inserts to comply with WRAP recycle schemes.
