

Ware 4 Bins & Recycling

Bins, Trolleys, Recycling and Waste Containers

WaveBrake Cleaning System

The WaveBrake mop bucket and wringer system reduces splashing, which means a safer environment, cleaner floors and improved productivity.

Hygiene – The use of a dirty water bucket and microfibre flat mops help reduce the risk of cross contamination significantly. The isolated dirty water reduces the risk of cross-contamination and divides the liquid weight meaning less lifting power is required when emptying buckets.

Features

- 33L Capacity
- Quiet castors ideal for noise-sensitive environments
- Optional dirty water separation bucket
- Large bucket capacity and multiple storage options
- Down press or side press wringer options compatible with all types of mops.

Materials: Durable polypropylene and tubular steel

Dimensions: 734 x 462 x 980mm (Mopping Trolley)

Colour options: Yellow, green, red and dark blue

WaveBrake Combos

- Left – side press wringer combo
- Centre – side press wringer combo with dirty water bucket
- Right – Mopping Trolley combo including down press wringer, dirty water bucket, removable maid caddy and accessory bucket
